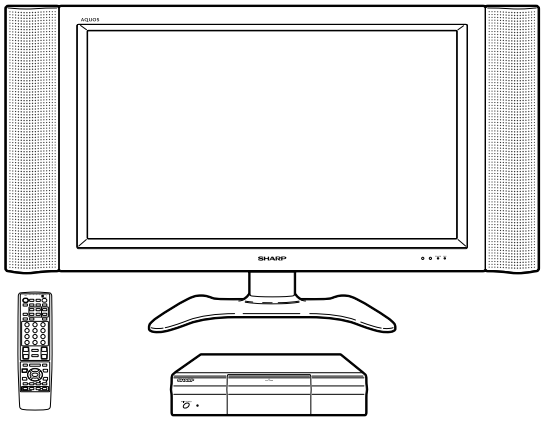
SHARP SERVICE MANUAL

S33Y4LC37HV4U



LCD COLOR TELEVISION

MODELS **LC-37HV4U**
LC-37HV4D

In the interests of user-safety (Required by safety regulations in some countries) the set should be restored to its original condition and only parts identical to those specified should be used.

OUTLINE

This model is different in the display size from the LC-30HV4U/LC-30HV4D.
This service manual accordingly describes the display alone. For the entire AVC System, refer to the LC-30HV4U/LC-30HV4D Service Manual (S33Y2LC30HV4U).

SHARP CORPORATION

This document has been published to be used for after sales service only.
The contents are subject to change without notice.

IMPORTANT SERVICE SAFETY PRECAUTION

■ **Service work should be performed only by qualified service technicians who are thoroughly familiar with all safety checks and the servicing guidelines which follow:**

WARNING

1. For continued safety, no modification of any circuit should be attempted.
2. Disconnect AC power before servicing.

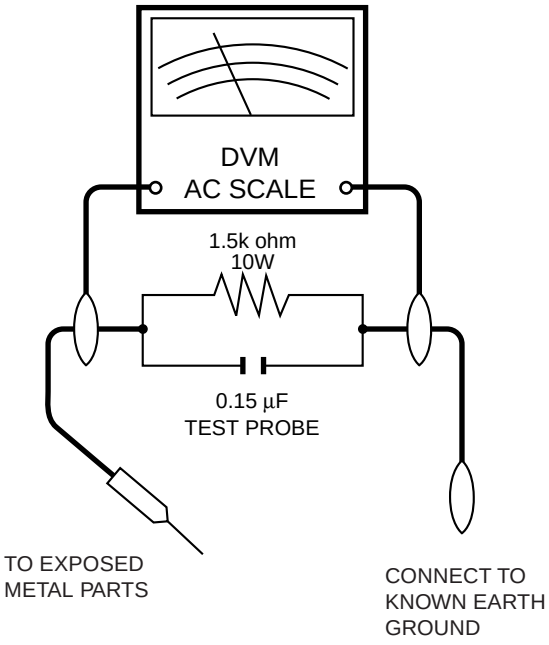
CAUTION: FOR CONTINUED PROTECTION AGAINST A RISK OF FIRE REPLACE ONLY WITH SAME TYPE FUSE.
AVC SIDE: F701 (T2AL, 250V)
LCD SIDE: F7501, F7502, F7503, F7504, F7551, F7552, F7553, F7611, F7612, F7613, F7614, F7641, F7642, F7643 (T1AL, 250V), F2701, F2702 (T2.5AH, 250V)

BEFORE RETURNING THE RECEIVER (Fire & Shock Hazard)

Before returning the receiver to the user, perform the following safety checks:

1. Inspect all lead dress to make certain that leads are not pinched, and check that hardware is not lodged between the chassis and other metal parts in the receiver.
2. Inspect all protective devices such as non-metallic control knobs, insulation materials, cabinet backs, adjustment and compartment covers or shields, isolation resistor-capacitor networks, mechanical insulators, etc.
3. To be sure that no shock hazard exists, check for leakage current in the following manner.

- Plug the AC cord directly into a 110~240 volt AC outlet.
- Using two clip leads, connect a 1.5k ohm, 10 watt resistor paralleled by a 0.15µF capacitor in series with all exposed metal cabinet parts and a known earth ground, such as electrical conduit or electrical ground connected to an earth ground.
- Use an AC voltmeter having with 5000 ohm per volt, or higher, sensitivity or measure the AC voltage drop across the resistor.
- Connect the resistor connection to all exposed metal parts having a return to the chassis (antenna, metal cabinet, screw heads, knobs and control shafts, escutcheon, etc.) and measure the AC voltage drop across the resistor.
  All checks must be repeated with the AC cord plug connection reversed. (If necessary, a nonpolarized adaptor plug must be used only for the purpose of completing these checks.)
  Any reading of 0.75 Vrms (this corresponds to 0.5 mA. rms AC.) or more is excessive and indicates a potential shock hazard which must be corrected before returning the monitor to the owner.



SAFETY NOTICE

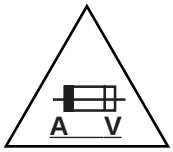
Many electrical and mechanical parts in LCD color television have special safety-related characteristics. These characteristics are often not evident from visual inspection, nor can protection afforded by them be necessarily increased by using replacement components rated for higher voltage, wattage, etc.
Replacement parts which have these special safety characteristics are identified in this manual; electrical components having such features are identified by " ⚠ " and shaded areas in the ***Replacement Parts List*** and ***Schematic Diagrams.***
For continued protection, replacement parts must be identical to those used in the original circuit.
The use of a substitute replacement parts which do not have the same safety characteristics as the factory recommended replacement parts shown in this service manual, may create shock, fire or other hazards.

PRECAUTIONS A PRENDRE LORS DE LA REPARATION

■ Ne peut effectuer la réparation qu' un technicien spécialisé qui s'est parfaitement accoutumé à toute vérification de sécurité et aux conseils suivants.

AVERTISSEMENT

1. N'entreprendre aucune modification de tout circuit. C'est dangereux.
2. Débrancher le récepteur avant toute réparation.



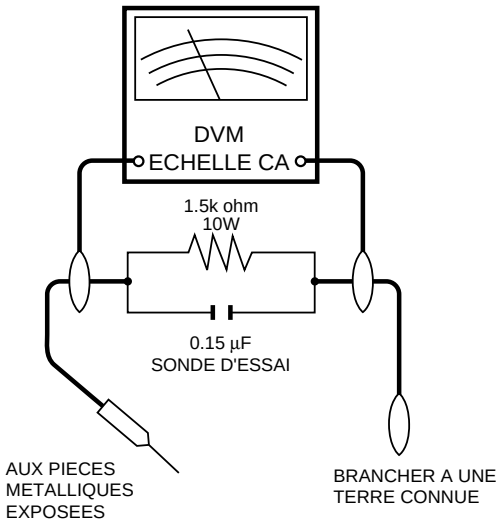
PRECAUTION: POUR LA PROTECTION CONTINUE CONTRE LES RISQUES D'INCENDIE, REMPLACER LE FUSIBLE
CÔTÉ AVC:F701 (T2AL, 250V)
CÔTÉ LCD:F7501, F7502, F7503, F7504, F7551, F7552, F7553, F7611, F7612, F7613, F7614, F7641, F7642, F7643 (T1AL, 250V), F2701, F2702 (T2.5AH, 250V)

VERIFICATIONS CONTRE L'INCEN-DIE ET LE CHOC ELECTRIQUE

Avant de rendre le récepteur à l'utilisateur, effectuer les vérifications suivantes.

1. Inspecter tous les faisceaux de câbles pour s'assurer que les fils ne soient pas pincés ou qu'un outil ne soit pas placé entre le châssis et les autres pièces métalliques du récepteur.
2. Inspecter tous les dispositifs de protection comme les boutons de commande non-métalliques, les isolants, le dos du coffret, les couvercles ou blindages de réglage et de compartiment, les réseaux de résistance-capacité, les isolateurs mécaniques, etc.
3. S'assurer qu'il n'y ait pas de danger d'électrocution en vérifiant la fuite de courant, de la facon suivante:

- Brancher le cordon d'alimentation directem-ent à une prise de courant de 110-240V. (Ne pas utiliser de transformateur d'isolation pour cet essai).
- A l'aide de deux fils à pinces, brancher une résistance de 1.5 kΩ 10 watts en parallèle avec un condensateur de 0,15µF en série avec toutes les pièces métalliques exposées du coffret et une terre connue comme une conduite électrique ou une prise de terre branchée à la terre.
- Utiliser un voltmètre CA d'une sensibilité d'au moins 5000Ω/V pour mesurer la chute de tension en travers de la résistance.
- Toucher avec la sonde d'essai les pièces métalliques exposées qui présentent une voie de retour au châssis (antenne, coffret métallique, tête des vis, arbres de commande et des boutons, écusson, etc.) et mesurer la chute de tension CA en-travers de la résistance. Toutes les vérifications doivent être refaites après avoir inversé la fiche du cordon d'alimentation. (Si nécessaire, une prise d'adpatation non polarisée peut être utilisée dans le but de terminer ces vérifications.)
  Tous les courants mesurés ne doivent pas dépasser 0,5 mA.
  Dans le cas contraire, il y a une possibilité de choc électrique qui doit être supprimée avant de rendre le récepteur au client.



AVIS POUR LA SECURITE

De nombreuses pièces, électriques et mécaniques, dans les téléviseurs présentent des caractéristiques spéciales relatives à la sécurité, qui ne sont souvent pas évidentes à vue. Le degré de protection ne peut pas être nécessairement augmentée en utilisant des pièces de remplacement étalonnées pour haute tension, puissance, etc.
Les pièces de remplacement qui présentent ces caractéristiques sont identifiées dans ce manuel; les pièces électriques qui présentent ces particularités sont identifiées par la marque " ⚠ " et hachurées dans la liste des pièces de remplacement et les diagrammes schématiques.
Pour assurer la protection, ces pièces doivent être identiques à celles utilisées dans le circuit d'origine. L'utilisation de pièces qui n'ont pas les mêmes caractéristiques que les pièces recommandées par l'usine, indiquées dans ce manuel, peut provoquer des électrocutions, incendies, radiations X ou autres accidents.

Precautions for using lead-free solder

1 Employing lead-free solder

"PWBs" of this model employs lead-free solder. The LF symbol indicates lead-free solder, and is attached on the PWBs and service manuals. The alphabetical character following LF shows the type of lead-free solder.

Example:

Indicates lead-free solder of tin, silver and copper.

2 Using lead-free wire solder

When fixing the PWB soldered with the lead-free solder, apply lead-free wire solder. Repairing with conventional lead wire solder may cause damage or accident due to cracks.

As the melting point of lead-free solder (Sn-Ag-Cu) is higher than the lead wire solder by 40°C, we recommend you to use a dedicated soldering bit, if you are not familiar with how to obtain lead-free wire solder or soldering bit, contact our service station or service branch in your area.

3 Soldering

As the melting point of lead-free solder (Sn-Ag-Cu) is about 220°C which is higher than the conventional lead solder by 40°C, and as it has poor solder wettability, you may be apt to keep the soldering bit in contact with the PWB for extended period of time. However, Since the land may be peeled off or the maximum heat-resistance temperature of parts may be exceeded, remove the bit from the PWB as soon as you confirm the steady soldering condition.

Lead-free solder contains more tin, and the end of the soldering bit may be easily corroded. Make sure to turn on and off the power of the bit as required.

If a different type of solder stays on the tip of the soldering bit, it is alloyed with lead-free solder. Clean the bit after every use of it.

When the tip of the soldering bit is blackened during use, file it with steel wool or fine sandpaper.

Be careful when replacing parts with polarity indication on the PWB silk.

Lead-free wire solder for servicing

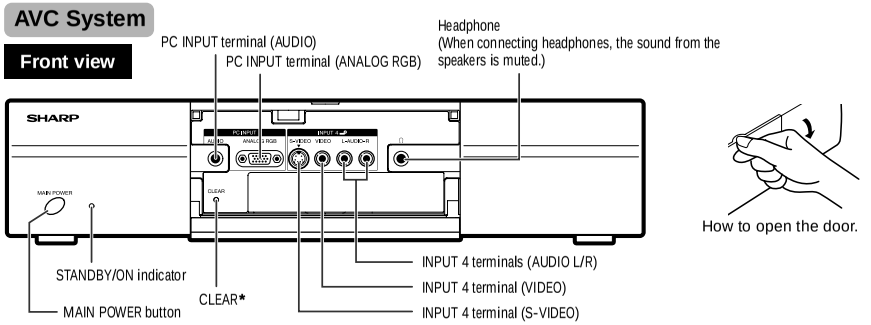
AVC System

Front view



* If the AVC System is switched on but it does not appear to be operating correctly, it may need resetting. In this case, press **CLEAR**, shown in the diagram, lightly with the end of a ballpoint pen or other pointed object. This will reset the System as shown below.
  - AV MODE resets to USER
  - TV channel returns to initial channel setting (Air:2ch, Cable:1 or 2ch)
  - Twin picture resets to normal
  - Audio setting initializes
  - SRS resets to off
  - Image position initializes

NOTE

- Pressing **CLEAR** will not work if the System is in standby mode (indicator lights red).
- Pressing **CLEAR** will not delete channel preset or secret number. See page for clearing the secret number when you know it. See page for initializing to the factory preset values when you forget your secret number.

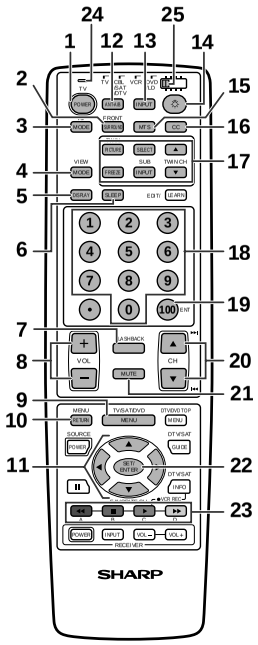
Remote control unit



NOTE

- When using the remote control unit, point it at the Liquid Crystal Television.
- See pages for operating buttons not listed on this page.

* SRS FOCUS is a trademark of SRS Labs, Inc.
FOCUS technology is incorporated under license from SRS Labs, Inc.

1 **TV POWER:** Switch the Liquid Crystal Television power on or off.

2 **FRONT SURROUND:** Set SRS* and FOCUS* Sound System mode.

3 **AV MODE:** Select an audio or video setting.
(AV mode: STANDARD, DYNAMIC, MOVIE, GAME, USER. PC mode: STANDARD, USER.)

4 **VIEW MODE:** Select the screen size.

5 **DISPLAY:** Display the channel information.

6 **SLEEP:** Set the sleep timer.

7 **FLASHBACK:** Return to the previous channel or input external mode.

8 **VOL +/−:** Set the volume.

9 **MENU:** Display the menu screen.

10 **MENU RETURN:** Return to the previous menu screen.

11 **▲/▼/◀/▶:** Select a desired item on the screen.

12 **ANT-A/B:** Select between ANT-A and B to watch broadcasts via the two tuners.

13 **INPUT:** Select a Liquid Crystal Television input source. (TV, INPUT 1, INPUT 2, INPUT 3, INPUT 4, PC)

14 **☼:** When pressed all buttons on the remote control unit will light. The lighting will turn off if no operations are performed within about 5 seconds. This button is used for performing operations in dark places.

15 **MTS:** Select the MTS/SAP.

16 **CC:** Display captions during closed-caption source.

17 **TWIN CH buttons**
TWIN PICTURE: Set the twin picture mode. Press again to return to normal screen.
FREEZE: Set the still image. Press again to return to normal screen.
SELECT: Select the active screen.
SUB INPUT: Select an input source of sub screen.

TWIN CH ▲/▼: Select the channel of sub screen.

18 **0 – 9:** Set the channel.

19 **100 ENT:** Select the three digit mode. Execute a command of the channel.

20 **CH ▲/▼:** Select the channel.

21 **MUTE:** Mute the sound.

22 **SET/ENTER:** Execute a command.

23 **FAVORITE CH**
A, **B**, **C**, **D:** Select four preset favorite channels in four different categories.
When viewing via ANT-A: up to 16 channels can be assigned in A, B, C and D.
When viewing via ANT-B: up to 16 channels can be assigned in A, B, C and D.
With ANT-A and B combined, you can preset up to 32 favorite channels in advance.

While watching, you can toggle the selected channels by pressing A, B, C and D.

24 **LED for transmission confirmation**

25 **Mode switch:**

Preparation

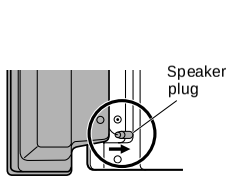
Attaching the speakers

The supplied speaker unit can be attached to or detached from the Display. It must be attached unless you use external amplifier/speakers.

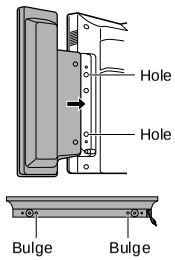
Before attaching (or detaching) speakers, unplug the AC cord from the AC outlet.

Be sure to attach or detach the speakers with two or more people.

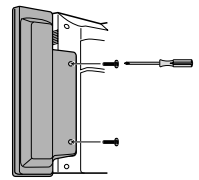
Example: Attaching right speaker.



Insert the speaker plug into the terminal on the Display.
- Make sure that the speaker plug is inserted completely.



Take hold of the speaker and slowly slide it to the Display.
- Make sure that the two bulges of the speaker align with the holes on the Display.



Fasten the screws to secure the speaker in place.
- Use a screwdriver.
- Perform the same steps for attaching left speaker.

CAUTION

- The speaker terminals on the Display are only for the supplied speaker unit. Do not connect any third party plug to the terminal or speaker to the Display.
- Do not handle or move the Display by the speakers.

NOTE

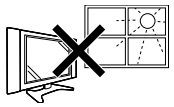
- Perform the same steps for both left and right speakers.
- To detach the speakers, perform the above steps in reverse order.
- You can connect your own amplifier/speakers to the Display. See page 56 for connecting external speakers.

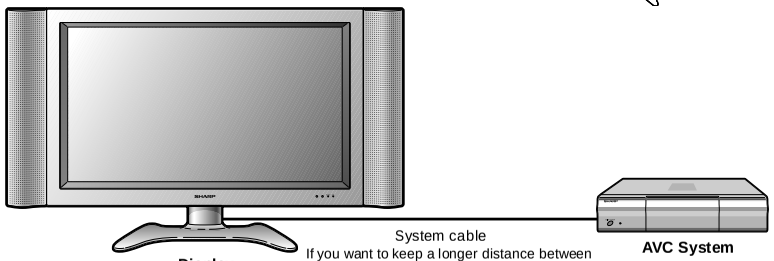
Where to place the System

"System" means the Display and AVC System. First select the location where to place the System.

1 Selecting the location of the System

- Select a place with no direct sunlight and good ventilation.
- The Display and the AVC System are connected by the system cable.





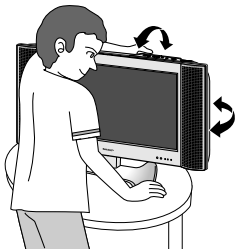
If you want to keep a longer distance between the Display and AVC System, please purchase the optional system cable AN-07SC1 (about 23 feet/7 meters).

2 Setting the System in place

Handling the Display

CAUTION

- The Display is very heavy. Move it with two or more people.
- Do not remove the stand from the Display unless using an optional bracket to mount it.
- When moving, put your hands on the Display, but never on the Display speakers.
- Keep enough space above and behind the Display.



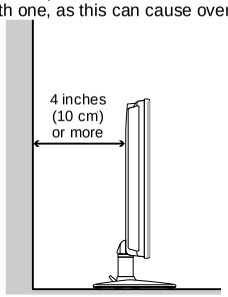
CAUTION

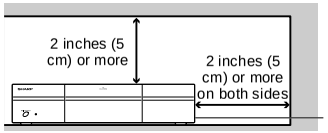
Adjust the screen with both hands. Put one hand on the Display and tilt the screen while steadying the stand with your other hand.
You can adjust the screen vertically up to 4 degrees forward or 6 degrees backward, or rotate 10 degrees horizontally.

Handling the AVC System

CAUTION

- Do not put a VCR or other device on the AVC System.
- Keep enough space above and on the sides of the AVC System.
- Do not block the ventilation openings on the top and left side, and the exhaust fan on the right side.
- Do not spread a thick cloth beneath the AVC System, or cover it with one, as this can cause overheating and result in malfunction.



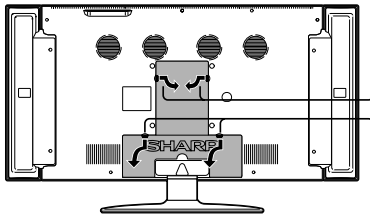


Setting the System

After putting the Display and the AVC System in place, connect the system cables and AC cords. Use the cable clamps for bundling the cables.

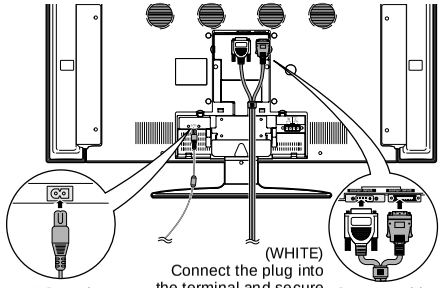
1 Removing the terminal cover

Display (rear view)



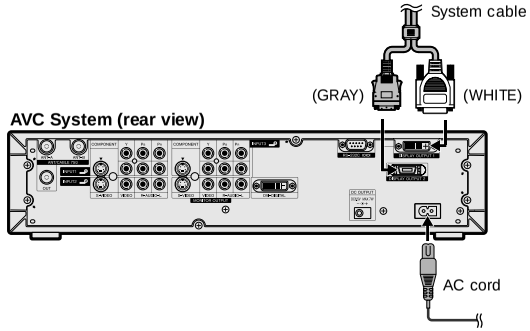
Press the two hooks toward the center of the Display and remove the cover toward you.
Press down the two upper hooks to remove the cover toward you.

2 Connecting the system cable and the AC cord to the Display



AC cord
(WHITE)
Connect the plug into the terminal and secure it by tightening the thumb screws.
System cable
(GRAY)
Connect the plug firmly until the hooks on both sides click.

3 Connecting the system cable and the AC cord to the AVC System



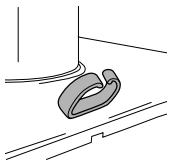
CAUTION

- **TO PREVENT RISK OF ELECTRIC SHOCK, DO NOT TOUCH UN-INSULATED PARTS OF ANY CABLES WITH THE AC CORD CONNECTED.**

4 Attaching the clamps and bundling the cables with the clamp

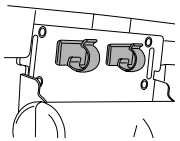
Cable clamp (Large)

Insert the cable clamp in the hole on the Display leg as shown.

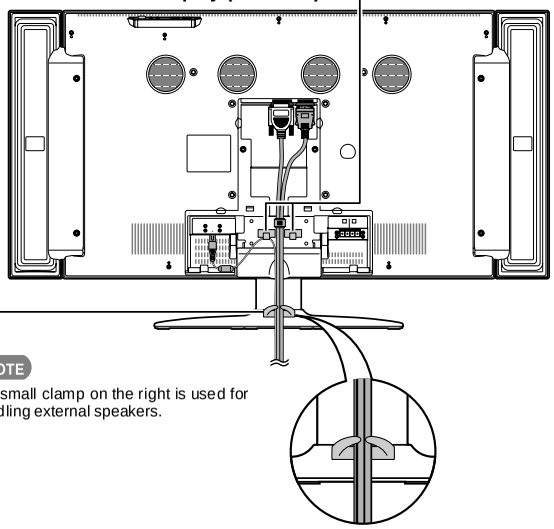


Cable clamp (Small)

Peel off the seal on the back and attach as shown.



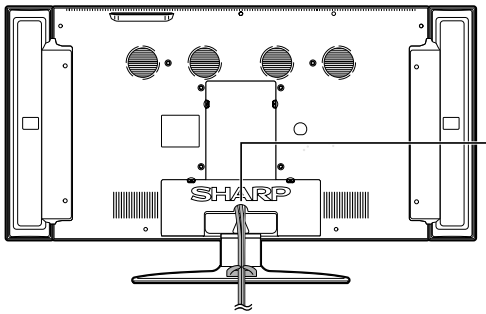
Display (rear view)



NOTE

- The small clamp on the right is used for bundling external speakers.

5 Closing the terminal cover



Cables come out from the small opening.

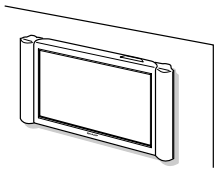
Setting the Display on the wall

Using an optional bracket to mount the Display

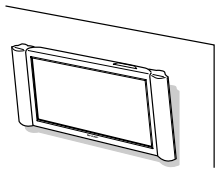
- You can ask a qualified service personnel about using an optional AN-37AG1 bracket to mount the Display to the wall.
- Carefully read the instructions that come with the bracket before beginning work.

Hanging on the wall

AN-37AG1 wall mount bracket. (See the bracket instructions for details.)



Vertical mounting



Angular mounting

CAUTION

- Installing the Liquid Crystal Television requires special skill that should only be performed by qualified service personnel. Customers should not attempt to do the work themselves. SHARP bears no responsibility for improper mounting or mounting that results in accident or injury.

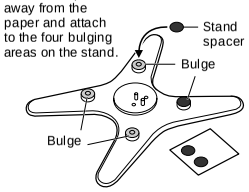
Setting the AVC System with the stand

How to install the AVC System vertically using the stand unit.

- Use the supplied stand unit for installing the AVC System vertically in an upright position.

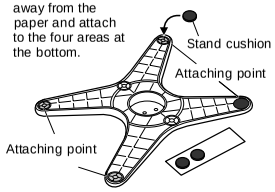
1 Stick each spacer to the stand as shown.

Peel each spacer away from the paper and attach to the four bulging areas on the stand.



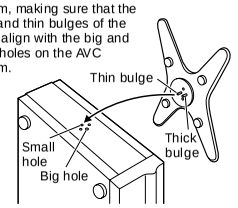
2 Attach each cushion to the stand as shown.

Peel each cushion away from the paper and attach to the four areas at the bottom.

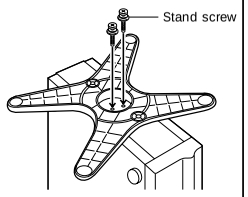


3 Fit the stand to the AVC System.

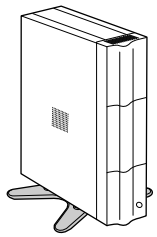
Insert the stand into the AVC System, making sure that the thick and thin bulges of the stand align with the big and small holes on the AVC System.



4 Attach the stand using the stand screws as shown.



The AVC System installed vertically with the stand.

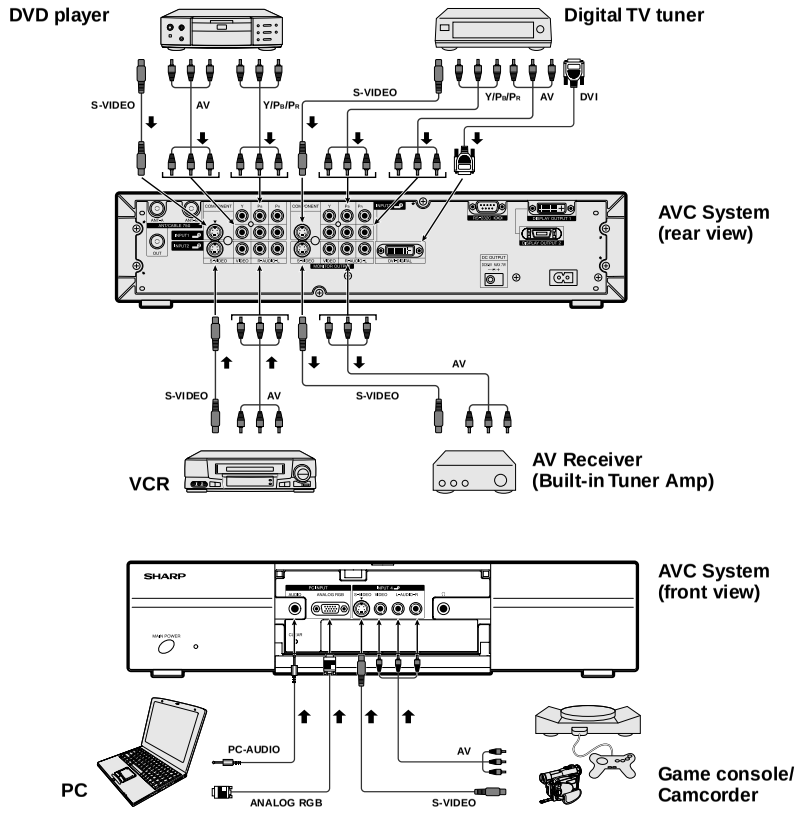


NOTE

- When mounting the AVC System vertically, always use the supplied stand. Be careful not to block vent holes when standing up directly on the floor or a flat surface as this can result in equipment failure.

Using external equipment

You can connect many types of external equipment to your System, like a DVD player, VCR, Digital TV tuner, PC, game console and camcorder. To view external source images, select the input source from **INPUT** on the remote control unit or on the Display.



CAUTION

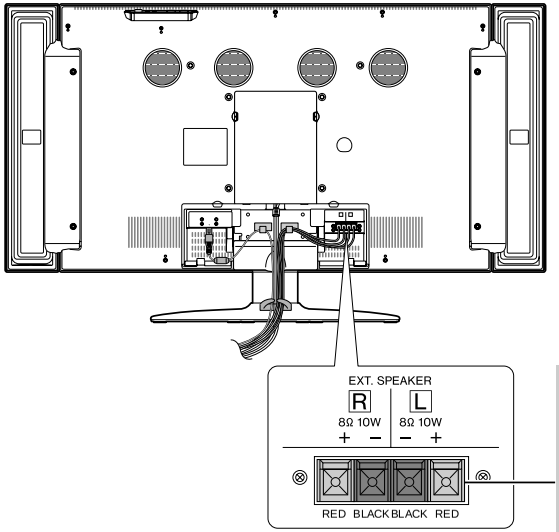
- To protect all equipment, always turn off the AVC System before connecting to a DVD player, VCR, Digital TV tuner, PC, game console, camcorder or other external equipment.

NOTE

- Please refer to the relevant operation manual (DVD player, PC, etc.) carefully before making connections.

Connecting external speakers

Rear view



How to connect the speaker cable

① Pull up the lid.

② Insert the edge of the cable.

③ Put the lid back down.

- Bundle the cables of the external speakers with clamps as shown above.

When using external speakers
- Change the speaker setting to external speakers.

Make sure to connect the speaker jack and cable polarity (+, −) properly
- The speaker jacks have plus (+) and minus (−) polarity.
- Plus is red and minus is black.
- The cables are also divided into plus and minus.
- When connecting the left/right speakers, be sure to connect the plus/minus jacks with the correct cables.

NOTE

- See page 11 for bundling the cables of the external speakers.
- Unplug the AC cord from the AC outlet before installing the speakers.

CAUTION

- Make sure external speakers have 8 ohm and 10 watt specifications.
- Connect the plus/minus jacks with the correct cables. Incorrect connection may cause a short.

RS-232C port specifications

PC Control of the System

- When a program is set, the Display can be controlled from the PC using the RS-232C terminal. The input signal (PC/AV) can be selected, the volume can be adjusted and various other adjustments and settings can be made, enabling automatic programmed playing.
- Attach an RS-232C cable cross-type (commercially available) to the supplied Din/D-Sub RS-232C for the connections.

NOTE

- This operation system should be used by a person who is accustomed to using computers.

Communication conditions

Set the RS-232C communications settings on the PC to match the display's communications conditions.
The Display's communications settings are as follows:

Baud rate:	9,600 bps
Data length:	8 bits
Parity bit:	None
Stop bit:	1 bit
Flow control:	None

Communication procedure

Send the control commands from the PC via the RS-232C connector.
The display operates according to the received command and sends a response message to the PC.
Do not send multiple commands at the same time. Wait until the PC receives the OK response before sending the next command.

Command format

Eight ASCII codes + CR

Command 4-digits:Command. The text of four characters.
Parameter 4-digits:Parameter 0 – 9, x, blank, ?

Parameter

Input the parameter values, aligning left, and fill with blank(s) for the remainder. (Be sure that 4 values are input for the parameter.)
When the input parameter is not within an adjustable range, "ERR" returns. (Refer to "Response code format".)
No problem to input any numerical value for "x" on the table.

0			
0	0	0	9
–	3	0	
1	0	0	
0	0	5	5

When "?" is input for some commands, the present setting value responds.

?			
?	?	?	?

Response code format

Normal response

Problem response (communication error or incorrect command)

Command table

- About the command except being indicated here, it is outside the guarantee range of operation.

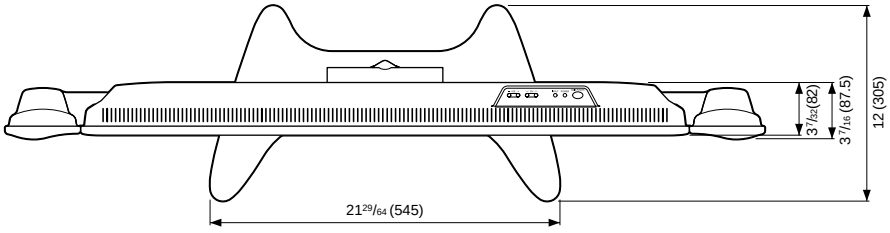
NOTE

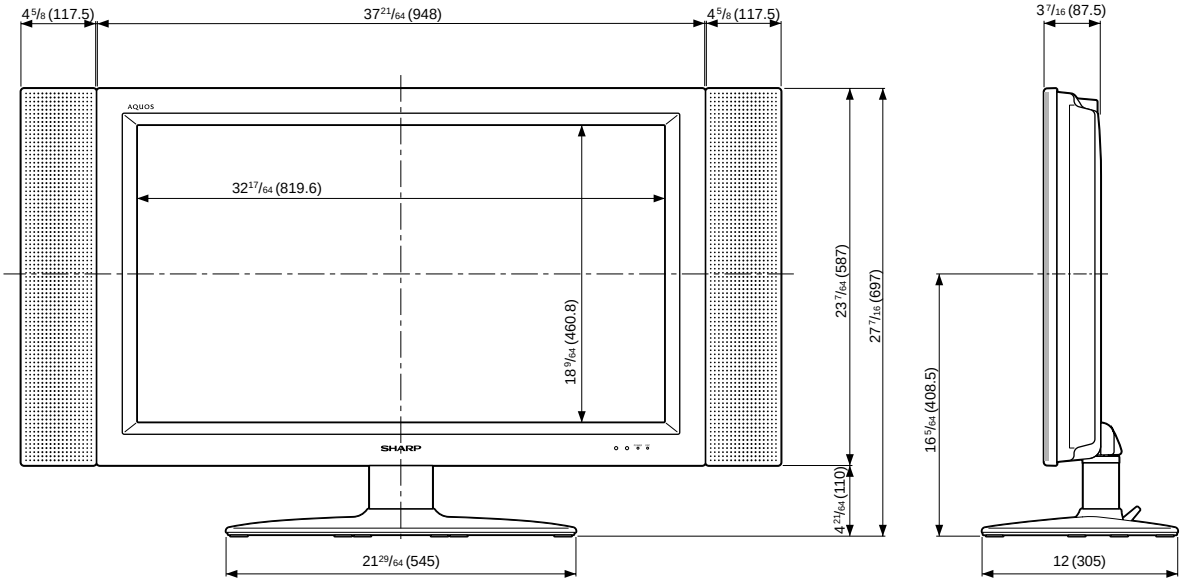
- If an underbar (_) appears in the parameter column, enter a space.
- If an asterisk (*) appears, enter a value in the range indicated in brackets under CONTROL CONTENTS.
- As long as that from which the parameter (×) in the table is a numerical value, it may write anything.

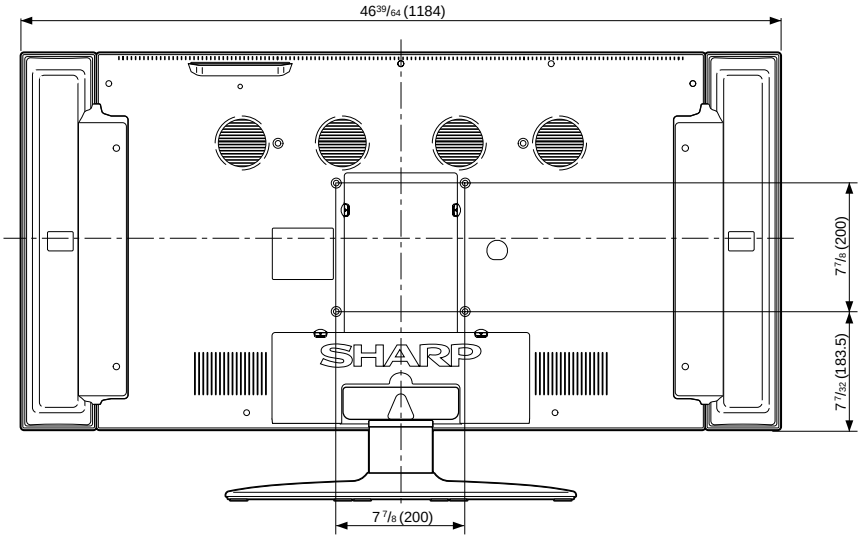
DIMENSIONS

Display

Unit: inch/(mm)

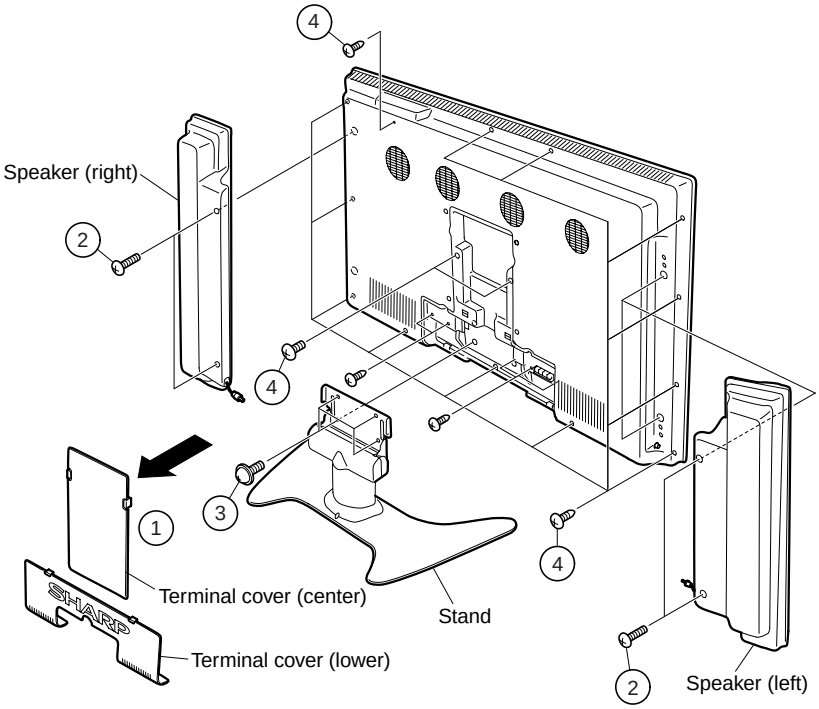


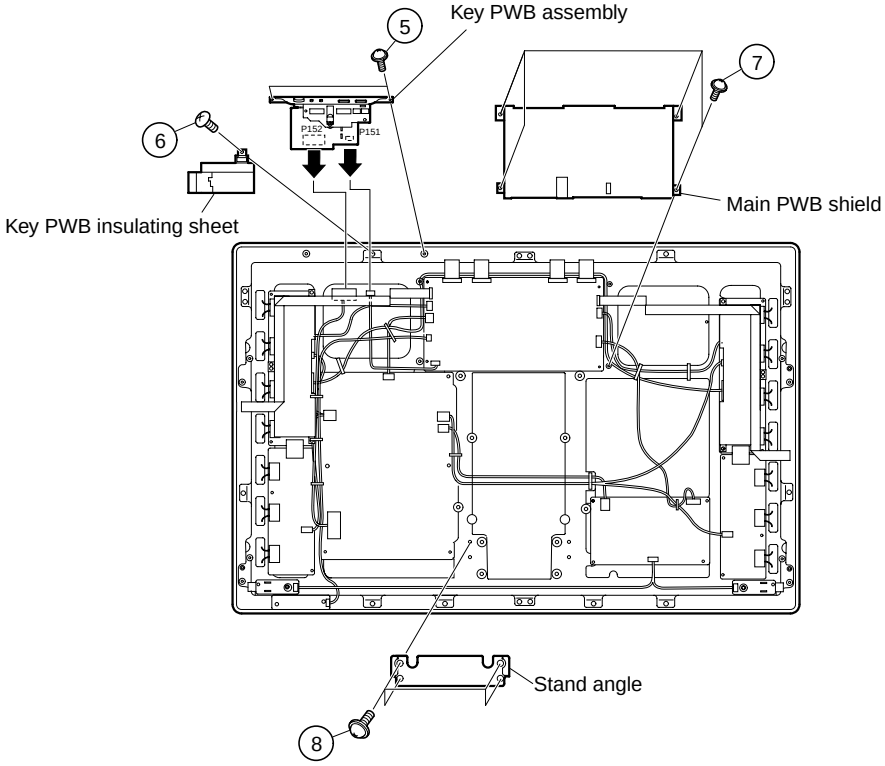




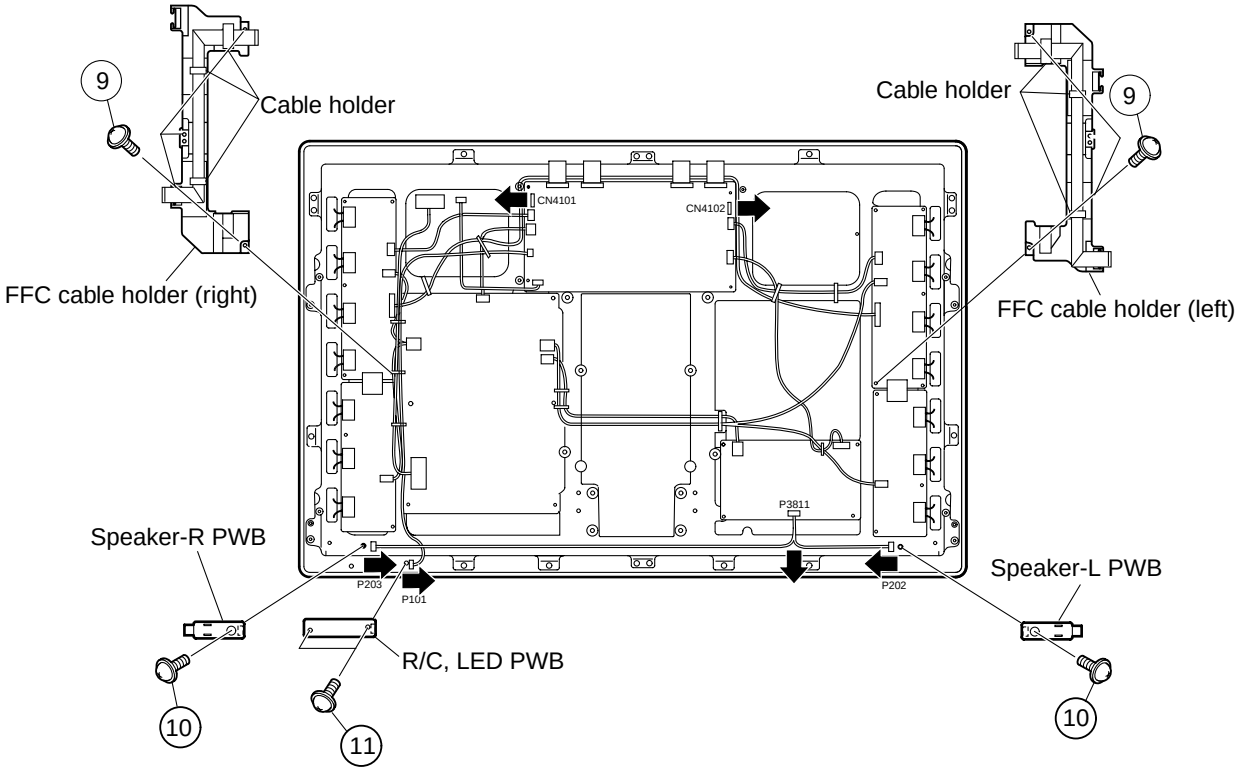
REMOVING OF MAJOR PARTS

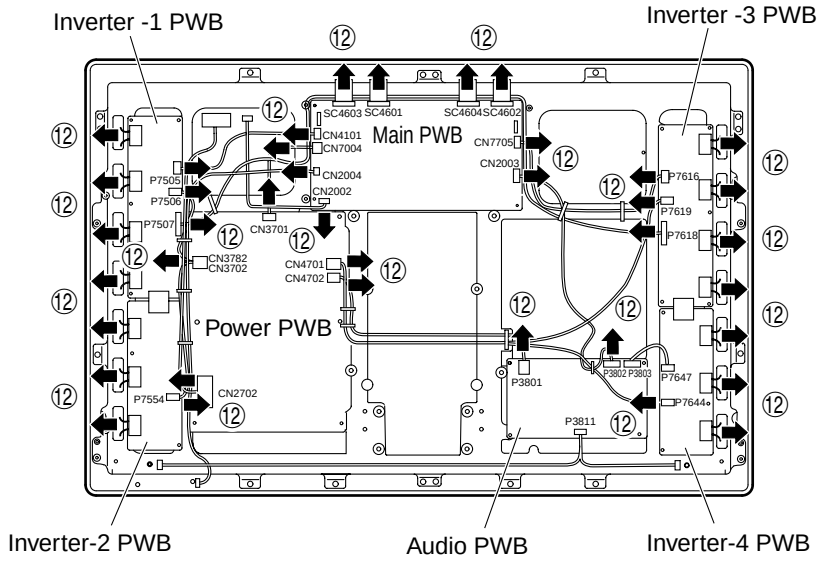
1.Take off the center and lower terminal covers.
2.Remove the two speaker fixing screws each and the speaker connecting terminal, and take off the speaker.
3.Remove the four stand fixing screws and take off the stand.
4.Remove the 19 cabinets A/B fixing screws and take off the cabinet B.
5.Remove the two key PWB assembly fixing screws and the connector, and take off the key PWB assembly.
6.Remove the key PWB insulating sheet fixing screw and take off the key PWB insulating sheet.
7.Remove the four Main PWB shield fixing screws and take off the Main PWB shield.
8.Remove the four stand angle fixing screws and take off the stand angle.



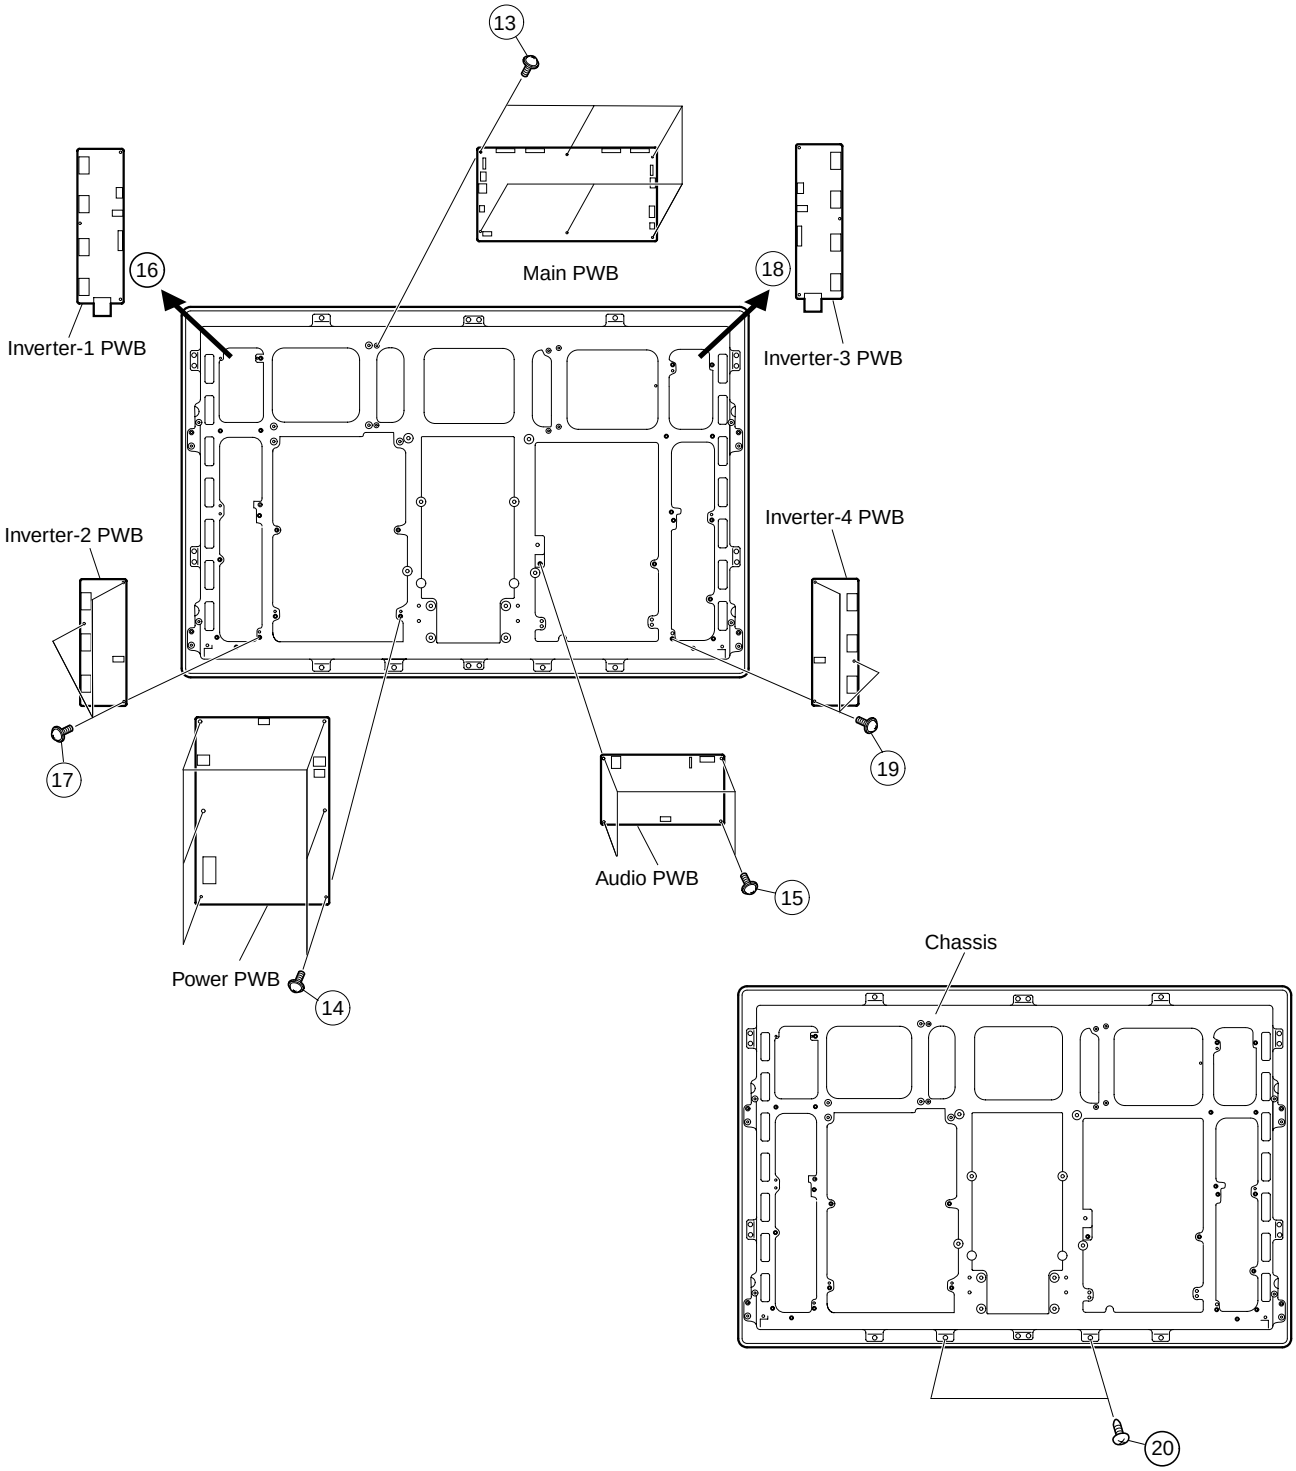


9. Open six FFC cable holders and remove the three FFC holder (right & left) fixing screws each and all the connectors of flat cables (FFC), and take off the FFC holders (right & left).
10. Remove the Speaker-L and-R PWB fixing screws each and the connectors of them, and take off the Speaker-L and-R PWBs.
11. Remove the two R/C, LED PWB fixing screws and the connector, and take off the R/C, LED PWB.
12. Remove all the connectors from each PWB.
    (Main PWB; 10 points, Power PWB; 5 points, Audio PWB; 3 points, Inverter -1 PWB 7; points, Inverter -2 PWB; 4 points, Inverter -3 PWB 7; points, and Inverter -4 PWB; 4points.)





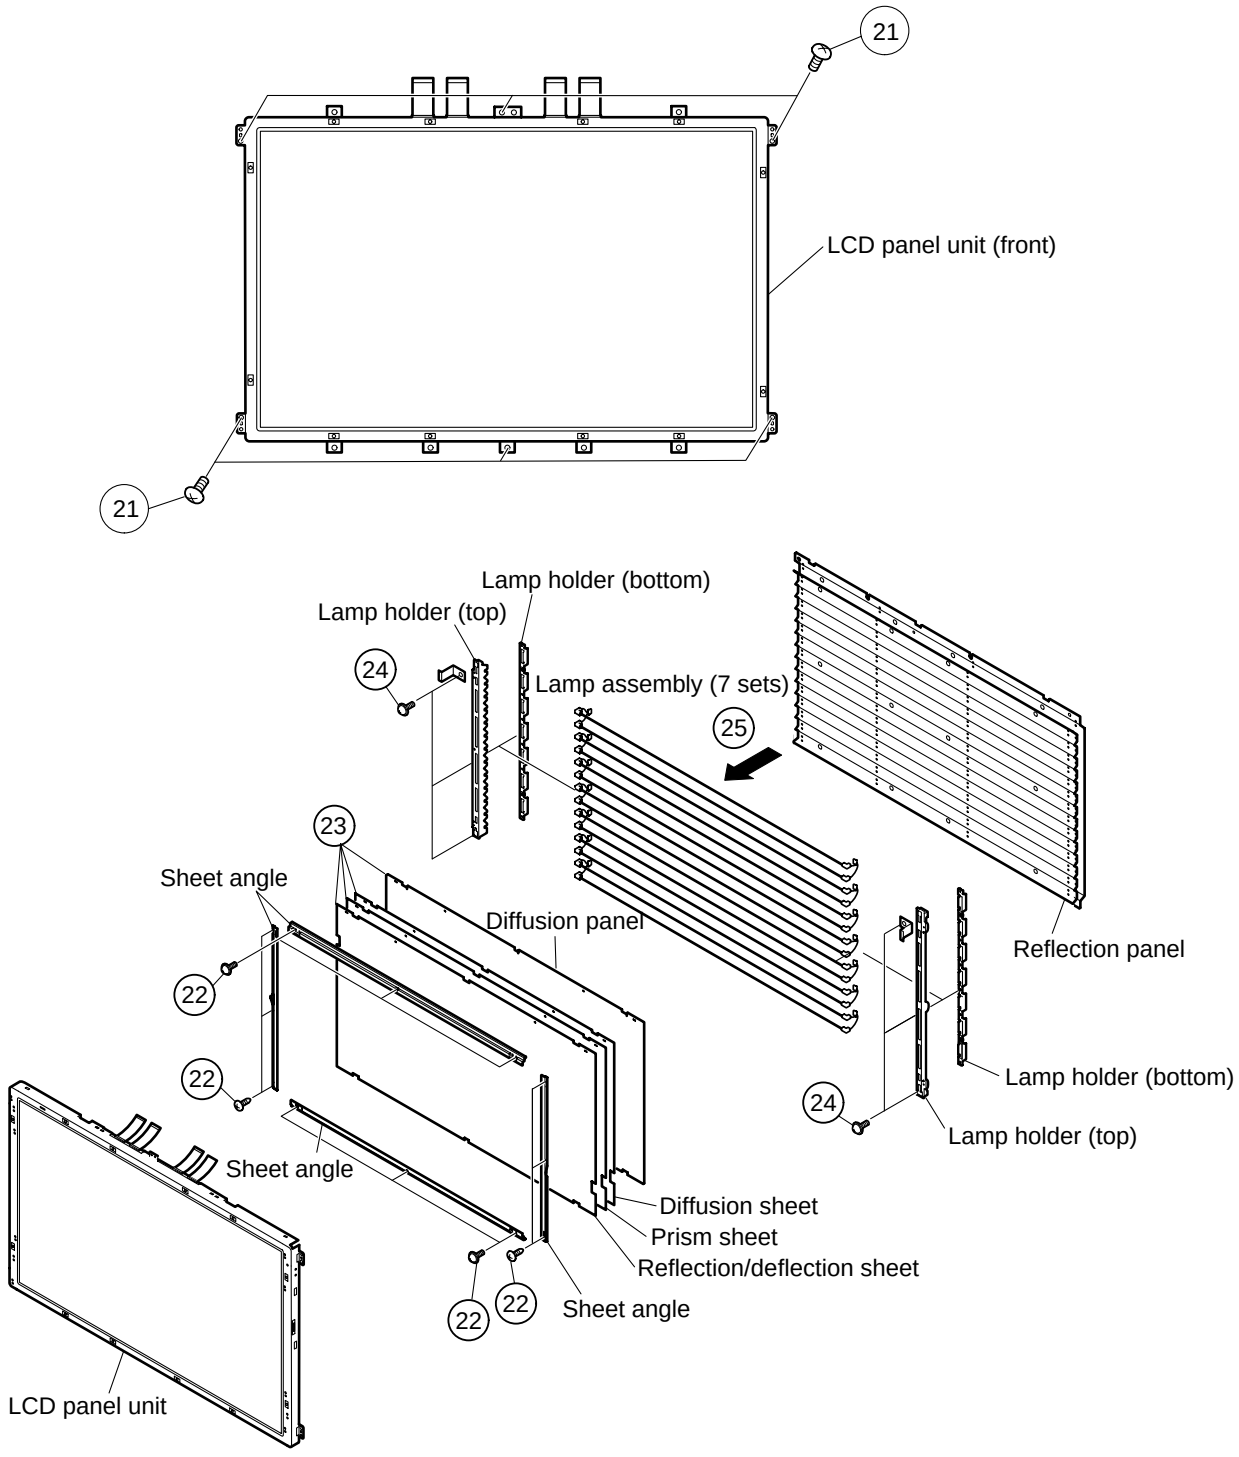
13.Remove the five main PWB fixing screws, and take off the main PWB.
14.Remove the six power PWB fixing screws, and take off the power PWB.
15.Remove the four audio PWB fixing screws, and take off the audio PWB.
16.Take off the inverter-1 PWB.
17.Remove the three inverter-2 PWB fixing screws, and take off the inverter-2 PWB.
18.Take off the inverter-3 PWB.
19.Remove the three inverter-4 PWB fixing screws, and take off the inverter-4 PWB.
20.Remove the two chassis fixing screws and take off the chassis.



• Handling Precautions for LCD Panel

1. Work in a clean room. (Humidity above 50%)
2. Operators should wear an earthing band.
3. Do not give a shock such as falling and vibration.
4. Use the ionizer. (Within 30 cm)

21. Remove the six LCD panel fixing screws and take off the LCD panel unit.
22. Remove the three sheet angle fixing screws, and take off the sheet angle.
23. Take off the reflection/deflection sheet, prism sheet, diffusion sheet and diffusion panel.
24. Remove the three lamp holders (top & bottom) fixing screws each, and take off the lamp holders (top & bottom).
25. Take off the lamp assembly from the lamp clip.



ADJUSTMENT PROCEDURES

Though the best adjustment is made at shipment from the factory, the following adjustment is required if the value should be deviated or some adjustment is needed after replacement of parts.

Display Side:

1. Preparation for Adjustment
   The unit needs to be replaced when the AVC System CONFIGROM (IC2202), receiver (IC2206) and HDCP key ROM (IC2208) are replaced.
   Applicable unit: DKEYHB453FE53 (LC-37HV4U)
   DKEYHB453FE56 (LC-37HV4D)

2. Adjustment
   Enter Adjustment Process mode. → VLSBIAS/15V voltage adjustment →
   GRAY level/14.5V voltage adjustment → COMBIAS adjustment → Background adjustment

3. Entry to Adjustment Process mode
   (1) For no connection of AVC System:
   With the display main power off, while pressing the "INPUT" and "VOL(–)" keys on the display body top together, turn on the display MAIN POWER. Then, starting is done at DISPLAY process mode.
   (2) For connection of AVC System:
   With the display main power off, while pressing the "CH (Down)" and "VOL(+)" keys on the display top together, turn on the Display MAIN POWER. Then, starting is done at DISPLAY process mode.

   In both cases of the above (1) & (2), K is displayed on the screen upper left. Then, when some key is pressed, the first page of DISPLAY ADJUST mode will start.
   ∗ If MAIN POWER is off, the adjustment process mode is released.

4. Key Operation List at Adjustment Process mode

Key	Function 1 (At page left end)	Function 2 (At value variable)
Cursor up	One item shift to up, Shift to previous page (At top)	Adjust value one increase or execution (At W&R items)
Cursor down	One item shift to down, Shift to next page (At bottom)	Adjust value one decrease or execution (At W&R items)
Cursor right	One item shift to right, Page shift (At initial page)	One item shift to right
Cursor left	One item shift to left, Page shift (At initial page)	One item shift to left
ENTER	Test pattern off	Item execution (At W&R items)
INPUT	Shift to next page	Shift to next page
CH_UP	One item shift to up, Shift to previous page (At top)	Adjust value one increase or execution (At W&R items)
CH_DOWN	One item shift to down, Shift to next page (At bottom)	Adjust value one decrease or execution (At W&R items)
VOL_UP	One item shift to right, Page shift/At initial page	One item shift to right
VOL_DOWN	One item shift to left, Page shift (At initial page)	One item shift to left

5. Adjustment

5-1 VLSBIAS/15V voltage adjustment

Shift to Item of VLS BIAS cursor up/down key, and select the value by cursor right/left key. Connect the digital voltage meter to MAIN PWB TP4101/No.30 pin of panel gate socket CN4102, and adjust to be 15.00±0.05V by the cursor up/down key.

5-2 GRAY LEVEL/14.5V voltage adjustment

Shift to Item of GRAY LEVEL by cursor up/down key, and select the value by cursor right/left key. Connect the digital voltage meter to MAIN PWB TP4104/near IC4105, and adjust to be 14.50±0.05V by cursor up/down key.

This adjustment should be correctly made because this power voltage is a reference voltage of tonal voltage.

5-3 COMBIAS adjustment

Shift to Item of COMBIAS by cursor up/down key, and select the value by cursor right/left key. If the value is varied by cursor up/down key, the test pattern is made, so adjustment should be made so that the flicker near the screen center becomes minimum.

5-4 Background adjustment

With AVC center connected, start the set and adjust the display background.

Sequence:

∗ Display the screen for adjustment/High-side 200 gradation & Low-side 48 gradation.
∗ Adjust ROFFSET, GOFFSET and BOFFSET to allow 200-gradation patterns as a standard.
Adjust the chromaticity of High pattern/screen left to be x=0.273 and y=0.285.
∗ Adjust R GAMMA, G GAMMA and B GAMMA to allow 48-gradation patterns as a standard.
Adjust the chromaticity of Low pattern/screen right to be x=0.268 and y=0.267.

The above adjustment can be made in the following method:

∗ Adjustment with RS-232C
∗ Prepare the personal computer with
WINDOWS95/98/Me/2000/xp inputted and provided with COM port/RS-232C, together with RS-232C cross cable.
∗ Start the set with RS232C cable connected.
∗ Start the terminal software. The free ware normally found on the Internet is allowed.
∗ The following should be set:

Baud rate	9600
Data	8bits
Parity	None
Stop	1bit
Flow control	None

∗ If they are set correctly, press ENTER key on the personal computer. "ERR" appears atop the terminal software.

∗ In this state, enter the command, listed below, and "ENTER" on the keyboard for adjustment.
Press "ENTER" and make sure that "OK" appears on the terminal software.
If "ERR" appears, try again.

RS232C commands list

Command	Function	Remarks
MSET1001	Background adjustment started.	Adjustment ended at a value other than 1001.
MOFR∗∗∗∗	R OFFSET value adjusted.	Range: 0000~0256
MOFG∗∗∗∗	G OFFSET value adjusted.	Range: 0000~0256
MOFB∗∗∗∗	B OFFSET value adjusted.	Range: 0000~0256
MGAR∗∗∗∗	R GAMMA value adjusted.	Range: 0020~0180
MGAG∗∗∗∗	G GAMMA value adjusted.	Range: 0020~0180
MGAB∗∗∗∗	B GAMMA value adjusted.	Range: 0020~0180
MINF0000	R GAMMA table displayed.	
MINF0001	G GAMMA table displayed.	
MINF0002	B GAMMA table displayed.	

Lamp error detection

[1] Function

This LCD color TV set is equipped with automatic power-off (lamp error detection) function. This safety measure serves if the lamp or the lamp circuit gets in trouble.

If by any chance the lamp or the lamp circuit gets in trouble, or if the lamp error detector gets activated for any other reasons, the following happens.

① Turn on the power, but it comes off in about 23 seconds. (The power LED indicator at the front of the set turns from green to red, and it starts flashing in red, repeating on for 250 ms and off for 1 sec.)

② If the action ① above occurs 5 times in a row, the power fails to turn on. (The power LED indicator starts flashing in red, repeating on for 250 ms and off for 1 sec.)

[2] Measures

2-1. Turn off the lamp error detector and check the trouble.

With the "MAIN POWER" switch off, hold down the "INPUT SELECT" and "VOL UP" keys and press the "MAIN POWER" switch. Now the "display process mode" (<K> appears onscreen) gets started. Then press on any key, and Page 1 of "Display adjustment mode" appears onscreen.

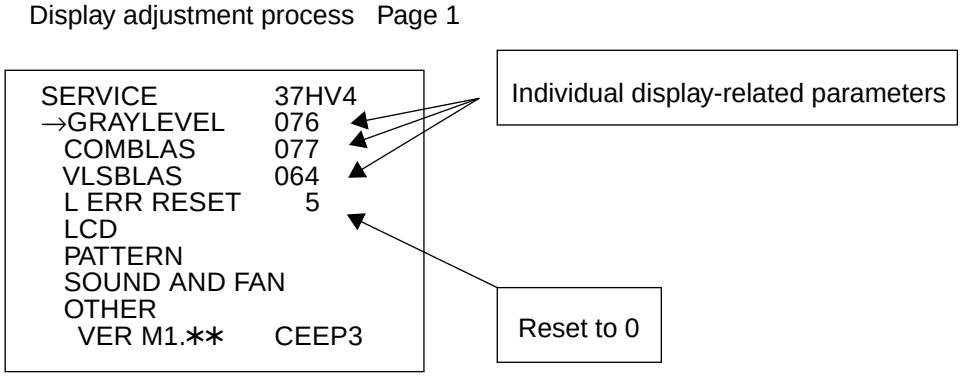
In so doing, the lamp and lamp circuit can be checked for anything unusual.

Also look at the 4th line "L ERR RESET" on Page 1 of "Display adjustment mode" to see if the value is more than 1. If so, it means a lamp error has been detected.

2-2. Reset the lamp error counter.

When the lamp and lamp circuit have been checked for trouble, reset the lamp error counter.

Using the "CURSOR UP/DOWN" key, move the cursor to the 4th line "L ERR RESET" on Page 1 of "Display adjustment mode". Using the "CURSOR RIGHT/LEFT" key, select the value of "L ERR RESET". Now press the "CURSOR UP/DOWN" key, and the counter will be back to 0.



Finally do the performance check and make sure no lamp error is detected.

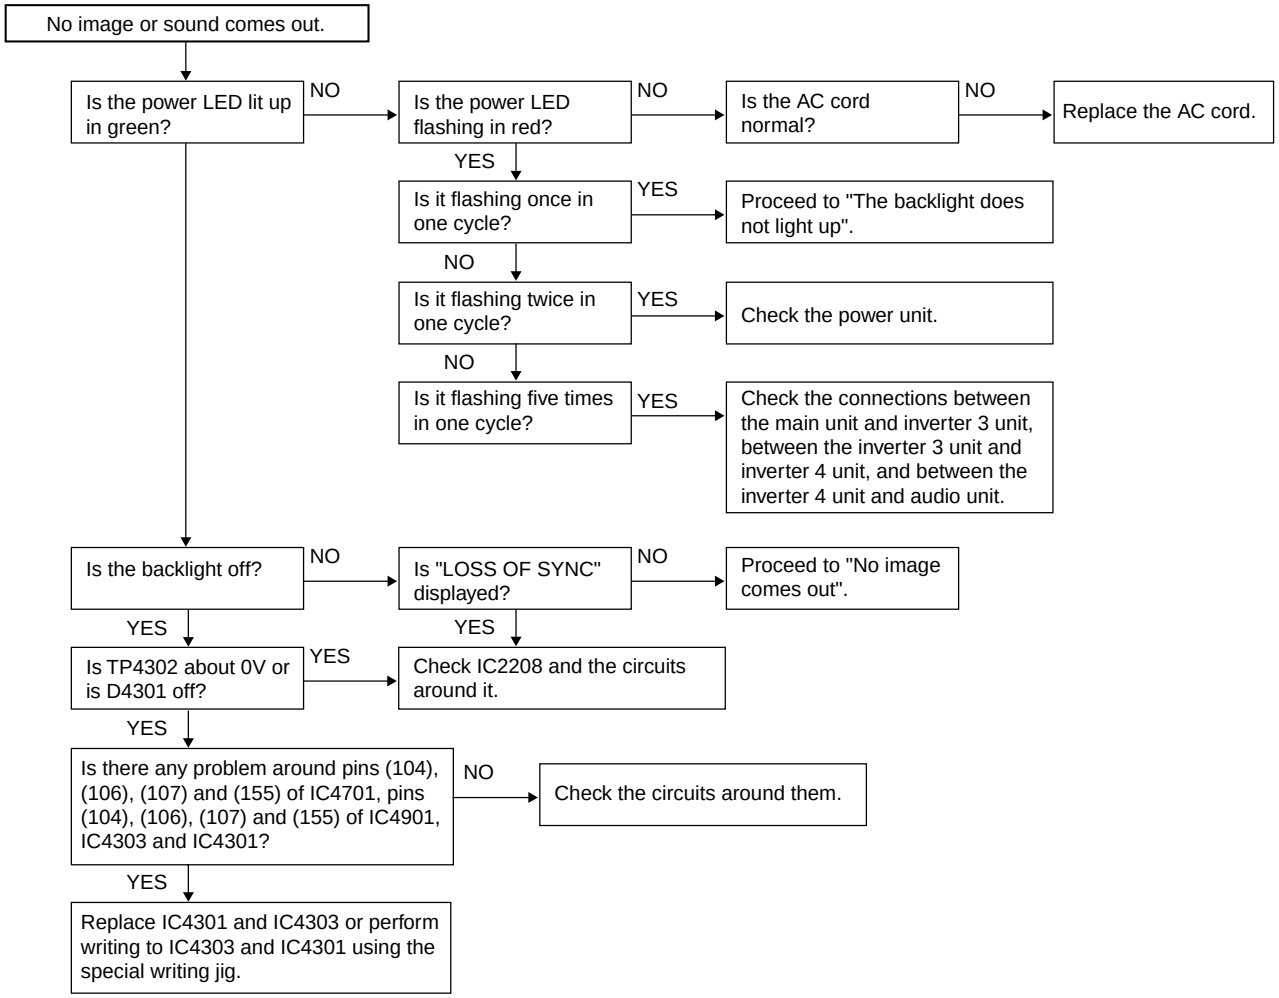
TROUBLE SHOOTING TABLE



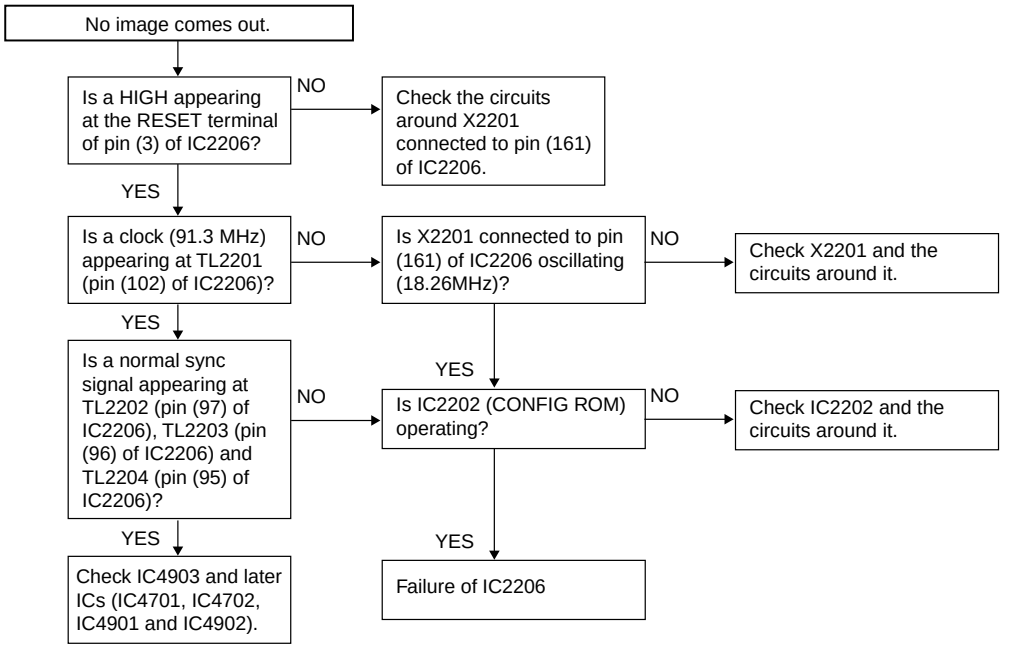
No image or sound comes out.
Is the power LED lit up in green?
NO
Is the power LED flashing in red?
NO
Is the AC cord normal?
NO
Replace the AC cord.
YES
Is it flashing once in one cycle?
YES
Proceed to "The backlight does not light up".
NO
Is it flashing twice in one cycle?
YES
Check the power unit.
NO
Is it flashing five times in one cycle?
YES
Check the connections between the main unit and inverter 3 unit, between the inverter 3 unit and inverter 4 unit, and between the inverter 4 unit and audio unit.
Is the backlight off?
NO
Is "LOSS OF SYNC" displayed?
NO
Proceed to "No image comes out".
YES
YES
Is TP4302 about 0V or is D4301 off?
YES
Check IC2208 and the circuits around it.
YES
Is there any problem around pins (104), (106), (107) and (155) of IC4701, pins (104), (106), (107) and (155) of IC4901, IC4303 and IC4301?
NO
Check the circuits around them.
YES
Replace IC4301 and IC4303 or perform writing to IC4303 and IC4301 using the special writing jig.

Note that it is necessary to replace the unit when replacing the Config ROM for receiver (IC2202), receiver IC (IC2208) and HDCP key ROM (IC2208). Have the relevant unit (DKEYHB453FE50) handy.

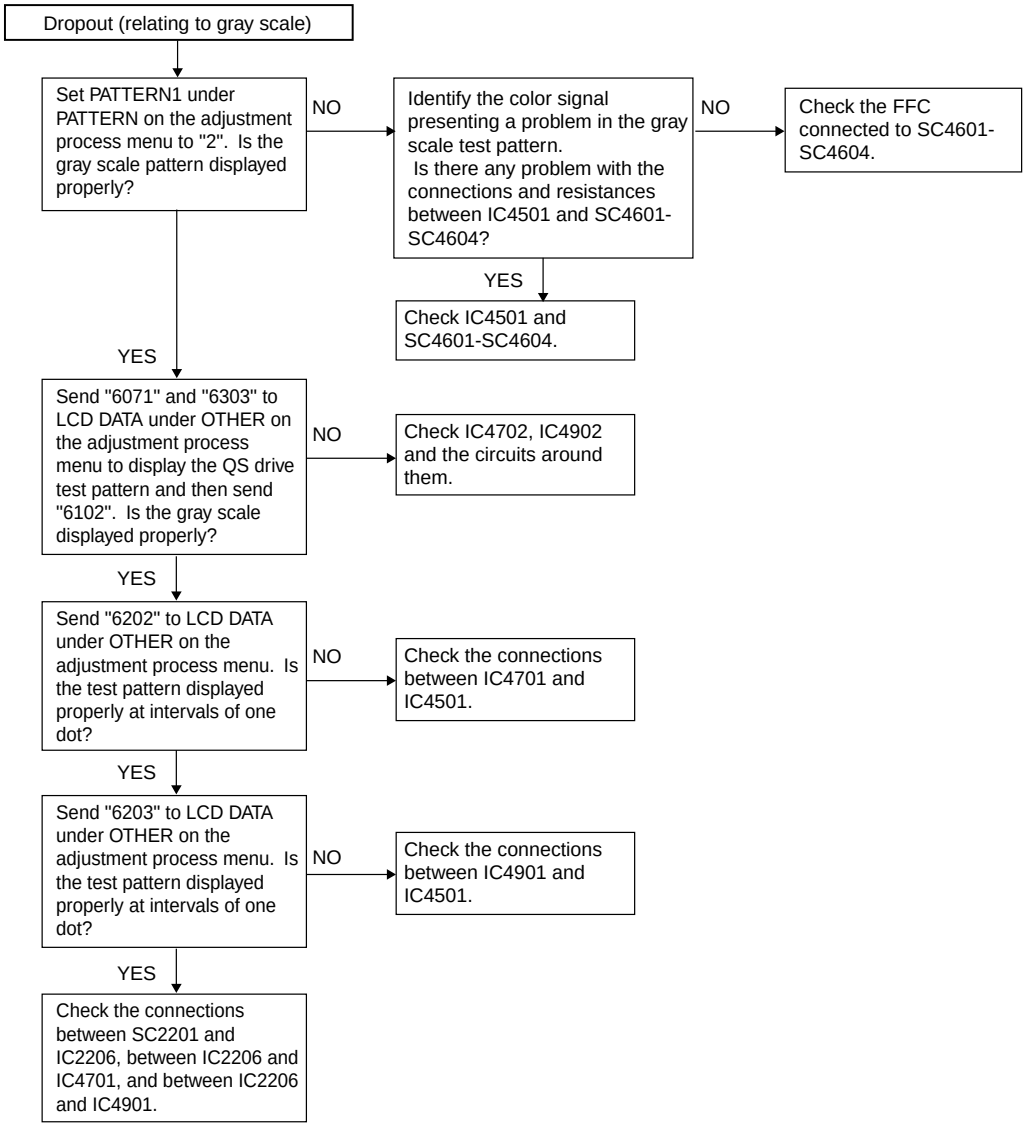
LED flashing timing list

Error type	LED behavior (1 cycle)
Cable error AVC-side power error	H: ON L: OFF
Lamp error	H: ON L: OFF 1S 250ms
Monitor power error	H: ON L: OFF
AVC temperature error	H: ON L: OFF
AVC FAN error	H: ON L: OFF
Monitor temperature error	H: ON L: OFF

TROUBLE SHOOTING TABLE (Continued)

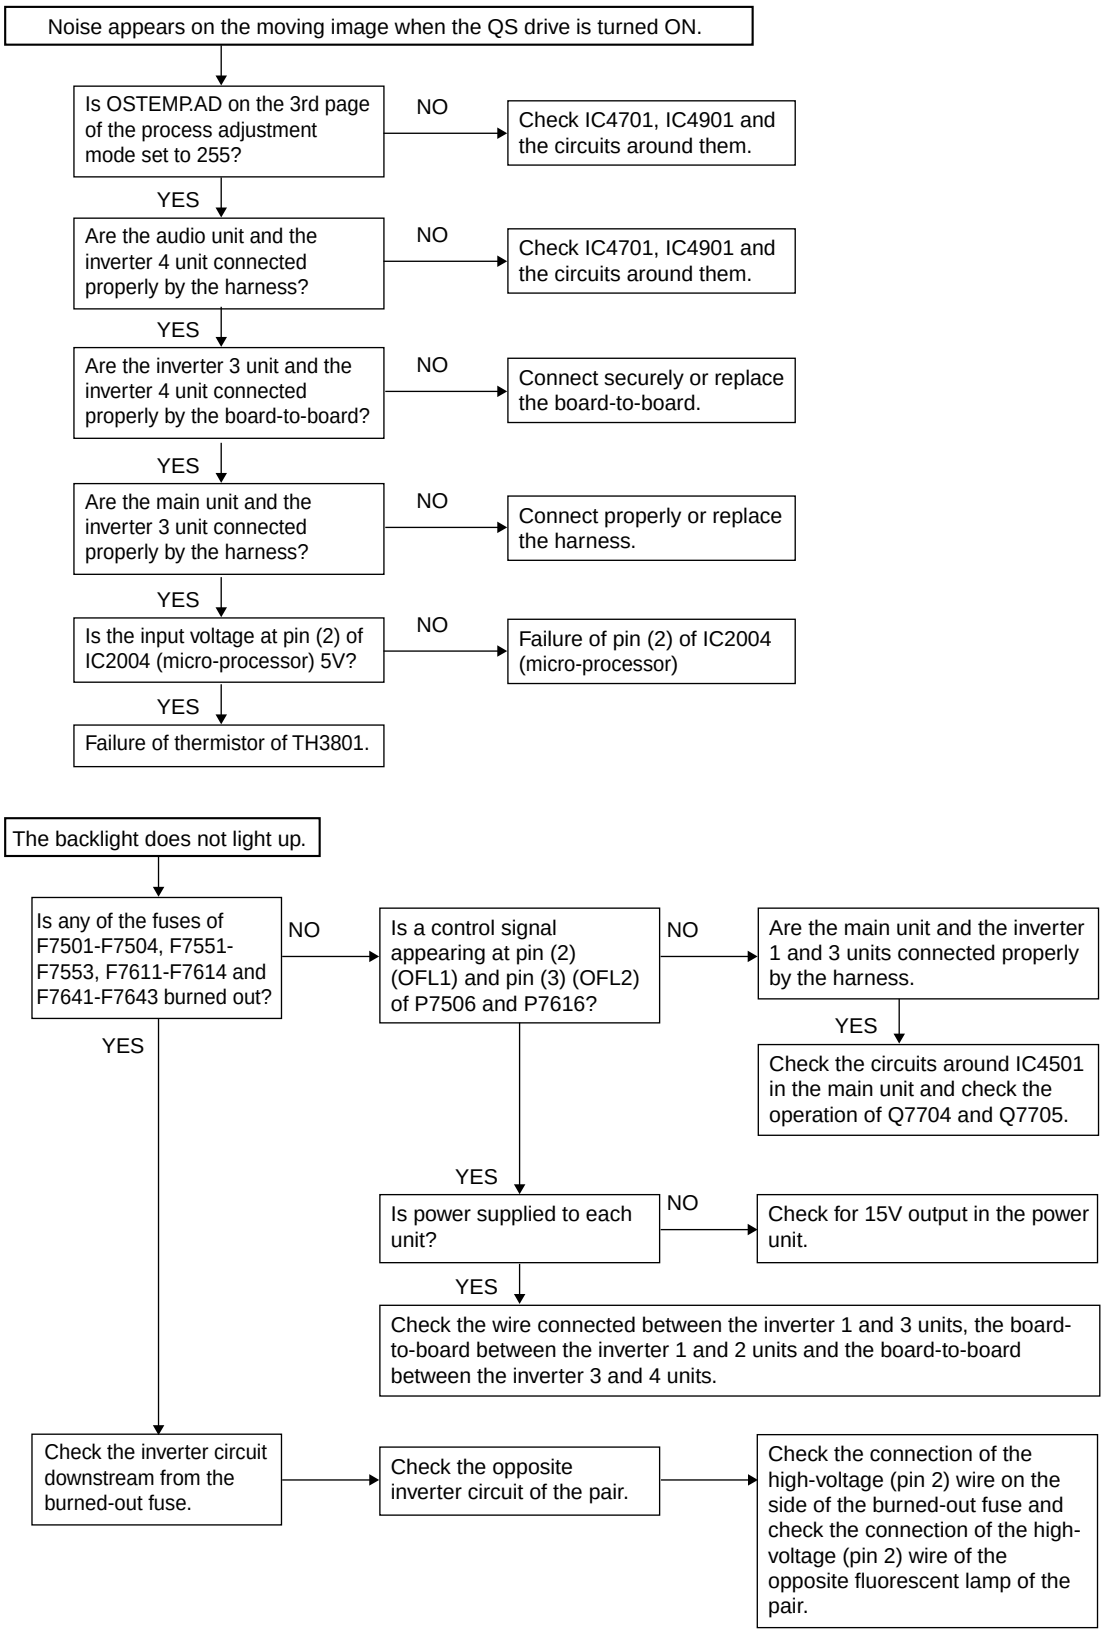


No image comes out.
Is a HIGH appearing at the RESET terminal of pin (3) of IC2206?
NO
Check the circuits around X2201 connected to pin (161) of IC2206.
YES
Is a clock (91.3 MHz) appearing at TL2201 (pin (102) of IC2206)?
NO
Is X2201 connected to pin (161) of IC2206 oscillating (18.26MHz)?
NO
Check X2201 and the circuits around it.
YES
Is a normal sync signal appearing at TL2202 (pin (97) of IC2206), TL2203 (pin (96) of IC2206) and TL2204 (pin (95) of IC2206)?
NO
Is IC2202 (CONFIG ROM) operating?
NO
Check IC2202 and the circuits around it.
YES
YES
Check IC4903 and later ICs (IC4701, IC4702, IC4901 and IC4902).
Failure of IC2206



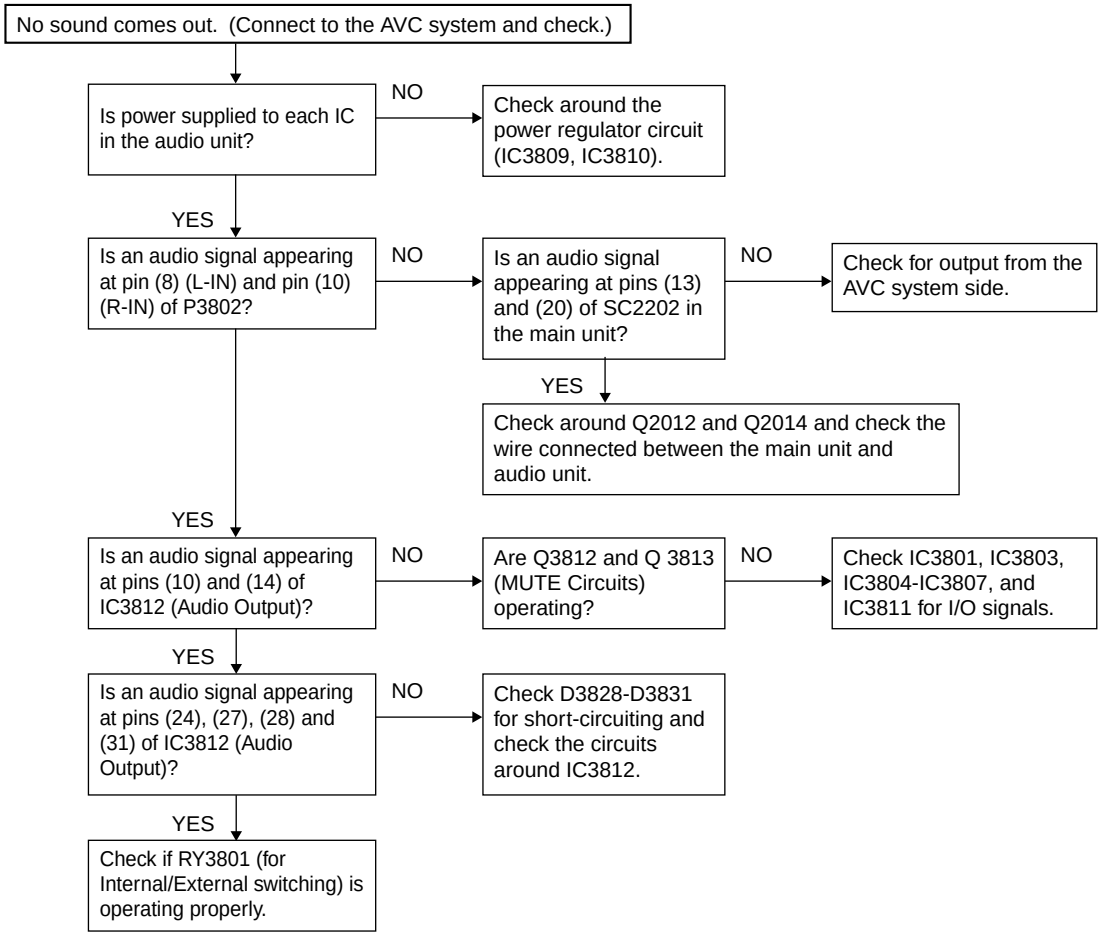
Dropout (relating to gray scale)
Set PATTERN1 under PATTERN on the adjustment process menu to "2". Is the gray scale pattern displayed properly?
NO
Identify the color signal presenting a problem in the gray scale test pattern.
Is there any problem with the connections and resistances between IC4501 and SC4601-SC4604?
NO
Check the FFC connected to SC4601-SC4604.
YES
Check IC4501 and SC4601-SC4604.
YES
Send "6071" and "6303" to LCD DATA under OTHER on the adjustment process menu to display the QS drive test pattern and then send "6102". Is the gray scale displayed properly?
NO
Check IC4702, IC4902 and the circuits around them.
YES
Send "6202" to LCD DATA under OTHER on the adjustment process menu. Is the test pattern displayed properly at intervals of one dot?
NO
Check the connections between IC4701 and IC4501.
YES
Send "6203" to LCD DATA under OTHER on the adjustment process menu. Is the test pattern displayed properly at intervals of one dot?
NO
Check the connections between IC4901 and IC4501.
YES
Check the connections between SC2201 and IC2206, between IC2206 and IC4701, and between IC2206 and IC4901.

TROUBLE SHOOTING TABLE (Continued)

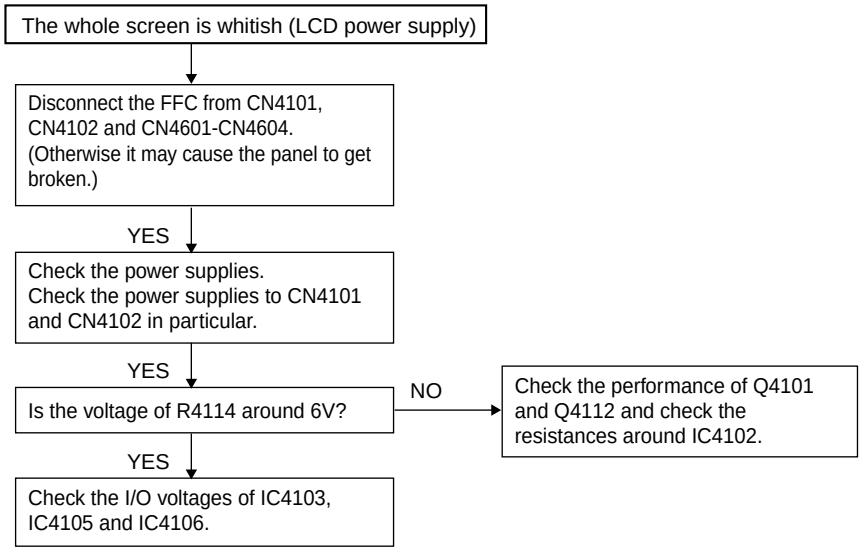


Noise appears on the moving image when the QS drive is turned ON.
Is OSTEMP.AD on the 3rd page of the process adjustment mode set to 255?
NO
Check IC4701, IC4901 and the circuits around them.
YES
Are the audio unit and the inverter 4 unit connected properly by the harness?
NO
Check IC4701, IC4901 and the circuits around them.
YES
Are the inverter 3 unit and the inverter 4 unit connected properly by the board-to-board?
NO
Connect securely or replace the board-to-board.
YES
Are the main unit and the inverter 3 unit connected properly by the harness?
NO
Connect properly or replace the harness.
YES
Is the input voltage at pin (2) of IC2004 (micro-processor) 5V?
NO
Failure of pin (2) of IC2004 (micro-processor)
YES
Failure of thermistor of TH3801.
The backlight does not light up.
Is any of the fuses of F7501-F7504, F7551-F7553, F7611-F7614 and F7641-F7643 burned out?
NO
Is a control signal appearing at pin (2) (OFL1) and pin (3) (OFL2) of P7506 and P7616?
NO
Are the main unit and the inverter 1 and 3 units connected properly by the harness.
YES
Check the circuits around IC4501 in the main unit and check the operation of Q7704 and Q7705.
YES
Is power supplied to each unit?
NO
Check for 15V output in the power unit.
YES
Check the wire connected between the inverter 1 and 3 units, the board-to-board between the inverter 1 and 2 units and the board-to-board between the inverter 3 and 4 units.
YES
Check the inverter circuit downstream from the burned-out fuse.
Check the opposite inverter circuit of the pair.
Check the connection of the high-voltage (pin 2) wire on the side of the burned-out fuse and check the connection of the high-voltage (pin 2) wire of the opposite fluorescent lamp of the pair.

TROUBLE SHOOTING TABLE (Continued)



No sound comes out. (Connect to the AVC system and check.)
Is power supplied to each IC in the audio unit?
NO
Check around the power regulator circuit (IC3809, IC3810).
YES
Is an audio signal appearing at pin (8) (L-IN) and pin (10) (R-IN) of P3802?
NO
Is an audio signal appearing at pins (13) and (20) of SC2202 in the main unit?
NO
Check for output from the AVC system side.
YES
Check around Q2012 and Q2014 and check the wire connected between the main unit and audio unit.
YES
Is an audio signal appearing at pins (10) and (14) of IC3812 (Audio Output)?
NO
Are Q3812 and Q 3813 (MUTE Circuits) operating?
NO
Check IC3801, IC3803, IC3804-IC3807, and IC3811 for I/O signals.
YES
Is an audio signal appearing at pins (24), (27), (28) and (31) of IC3812 (Audio Output)?
NO
Check D3828-D3831 for short-circuiting and check the circuits around IC3812.
YES
Check if RY3801 (for Internal/External switching) is operating properly.



The whole screen is whitish (LCD power supply)
Disconnect the FFC from CN4101, CN4102 and CN4601-CN4604. (Otherwise it may cause the panel to get broken.)
YES
Check the power supplies. Check the power supplies to CN4101 and CN4102 in particular.
YES
Is the voltage of R4114 around 6V?
NO
Check the performance of Q4101 and Q4112 and check the resistances around IC4102.
YES
Check the I/O voltages of IC4103, IC4105 and IC4106.

DESCRIPTION OF SCHEMATIC DIAGRAM

VOLTAGE MEASUREMENT CONDITION:

1. When the exclusive-use AC adapter is used, the colour bar signal of colour bar generator for service is input to get the normal screen. When the audio is minimized, the voltage value is measured with the 20 kΩ/V tester.

WAVEFORM MEASUREMENT CONDITION:

1. When the exclusive-use AC adapter is used, the colour density, lightness and colour hue are set to the center position, and the signal of colour bar generator for service is observed to get waveform.
2. ◯▶ indicates waveform check points (See chart, waveforms are measured from point indicated to chassis ground.)

INDICATION OF RESISTOR & CAPACITOR:

RESISTOR

1. The unit of resistance "Ω" is omitted. (K=kΩ=1000 Ω, M=MΩ).
2. All resistors are ± 5%, unless otherwise noted. (J= ± 5%, F= ± 1%, D= ± 0.5%)
3. All resistors are Carbon type, unless otherwise noted.
   Ⓒ: Solid Ⓦ : Cement
   Ⓢ: Oxide Film Ⓣ : Special
   Ⓝ: Metal Coating

CAPACITOR

1. All capacitors are mF, unless otherwise noted. (P=pF=mmF).
2. All capacitors are Ceramic type, unless otherwise noted.
   (ML) : Mylar (TA) : Tantalum
   (PF) : Polypro Film (ST) : Styrol

CAUTION:
This circuit diagram is original one, therefore there may be a slight difference from yours.

IMPORTANT SAFETY NOTICE:
PARTS MARKED WITH "⚠" ( ) ARE IMPORTANT FOR MAINTAINING THE SAFETY OF THE SET. BE SURE TO REPLACE THESE PARTS WITH SPECIFIED ONES FOR MAINTAINING THE SAFETY AND PERFORMANCE OF THE SET.

PARTS LIST

PARTS REPLACEMENT

Replacement parts which have these special safety characteristics identified in this manual; electrical components having such features are identified by ⚠ and shaded areas in the Replacement Parts Lists and Schematic Diagrams. The use of a substitute replacement part which dose no have the same safety characteristic as the factory recommended replacement parts shown in this service manual may create shock, fire or other hazards.

"HOW TO ORDER REPLACEMENT PARTS"

To have your order filled promptly and correctly, please furnish the following informations.

1. MODEL NUMBER
2. REF. NO.
3. PART NO.
4. DESCRIPTION

in **USA**: Contact your nearest SHARP Parts Distributor to order. For location of SHARP Parts Distributor, Please call Toll-Free; 1-800-BE-SHARP

LISTE DES PIECES

CHANGE DES PIECES

Les pi`eces de rechange qui pr élelesentent ces caract éleristiques sp éleciales de s élecurit éle, sont identifi élees dans ce manuel : les pi`eces élelectriques qui pr élesentent ces particularit éles, sont rep éler élee par la marque ⚠ et sont hachur élees dans les listes de pi`eces et dans les diagrammes sch élematiques.
La substitution d'une pi`ece de rechange par une autre qui ne pr éLesente pas les m éoemes caract éLeristiques de s élecurit éle que la pi`ece recommand élee parl'usine et dans ce manuel de service, peut provoquer une éLelectrocution, un incendie ou toutautre sinistre.

"COMMENT COMMANDER LES PIECES DE RECHANGE"

Pour que votre commande soit rapidement et correctement remplie, veuillez fournir les renseignements suivants.

1. NUMERO DU MODELE
2. NO. DE REF
3. NO. DE PIECE
4. DESCRIPTION

in **CANADA**: Contact SHARP Electronics of Canada Limited
Phone (416) 890-2100
